1. CELLULAR SIGNALING

CHEM F675-001

002 CRN 389

3 CREDITS

[redacted]

Ursula Kummer and Karin Mulberg, D. Decker,

Second Edition, Routledge, 2007,

ISBN 0-415-37753-4534-3

7. LEARNING OUTCOMES and COURSE GOALS

- Develop an overview of molecular signaling
- Comprehend the connections between of biochemistry/structure/function
- Ability to explain the molecular mechanisms of
- Ability to explain the signal transduction pathways
- Ability to explain the molecular mechanisms of cellular signaling
- Ability to explain the molecular mechanisms of diseases

8. INSTRUCTIONAL METHODS

Review of

Lectures by instructor and

[redacted]

Grading will be based on the +/- system
