Course Readings/Materials

The following materials are *required* for the course and can be purchased.

1. Organic Chemistry, 9th edition, Leroy G. Wade and Jan William Simek, Pearson, 2017. The most economical option is the eText + Mastering instant access.
https://www.pearson.com/store/p/organic_chemistry/P100001143844/9780136781776
18-weeks (first semester only) is \$75. Two-semesters (24 months) is \$125.
eText and Mastering: ISBN - 13: 9780136781776
2. Mastering Chemistry, digital platform from Pearson for online Homework. See link above.
3. Lab Textbook: Making the Connections³; A How-to-Guide for Organic Chemistry Lab Techniques, 3rd edition, Anne B. Padias, 2015, Hayden McNeil. Available from

Mastering Homework problems will be assigned using questions from the textbook in coordination with the Mastering digital platform. Mastering will be accessed through Canvas. All students need to purchase the access code and register through Canvas.

The videos will be short, typically no more than 10-15 min, with identified topics. You will be prompted with questions, typically multiple choice or short answer, as you move through video. The video content will correlate with the order of chapters in the textbook, covering Chapters 1-14. Students are expected to watch all videos that are posted.

Course Goals

1. Be able to interpret, explain, and predict the physical and chemical properties of organic molecules based on their molecular structures, functional groups, and reaction conditions.
