

Practical Nuclear Magnetic Resonance Spectroscopy

1. Course information:

Course number: F419

2 credits Offered Spring semesters

Prerequisites: CHEM 321 or instructor permission

Location:

Lectures will be in REIC 138

Labs will be in REIC 136 for NMR time and REIC 132 will be available for some reactions and sample preparation.

Meeting time:

Lecture: Wednesdays: 11:45 am - 12:45 pm

Lab: Scheduled by the students as needed. Should average 3 hours per week, and not exceed 42 hours for the semester.

2. Instructor Information:

Dr. Carl Murphy, office: REIC 136; Phone: 474-5545;

e-mail: cjmurphy4@alaska.edu

Office Hours: Mondays: 11:45 am-12:45 pm or by appointment.

3. Textbook:

Required: Organic Structures from 2D NMR Spectra, L.D. Field, Wiley, 2015 first edition ISBN: 1118868943 (\$56).

Students will spend much of the class time getting hands on experience on the NMR. The second half of the class will be student-driven NMR-based research projects. At the end of the class students will present their projects to the rest of the class.

5. Course Goals:

To provide students with a working background on Nuclear Magnetic Resonance, train them to be independent users of the NMR, and allow them to explore aspects of the NMR with a research project.

6. Student Learning Outcomes:

Students should leave this course with a basic understanding of NMR. They should also be able to safely operate the NMR instruments for standard NMR experiments in any future research in which they are involved.

7. Instructional Methods:

Lectures on the basics of NMR and its safe use will meet during the beginning of the semester. The laboratory meetings will focus on training students to operate the instruments. As students complete training they will be given user accounts on the NMR to start pursuing their own research project. The class will meet again at the end of the semester for students to present their research results.

8. Course calendar (tentative):

Lecture Day	Lecture	Lab
1/17/2018	NMR Basics, Safety, and Review	NMR Tour and Check-in
1/24/2018	Intramolecular Interactions	Lab 1, Learning the 300 MHz NMR
1/31/2018	Liquid Nitrogen Safety Meet in 136	Lab 1, Learning the 300 MHz NMR
2/7/2018	Spectral Interpretation	Lab 2, Learning the 600 MHz NMR
2/14/2018	Unknown Practice	Lab 2, Learning the 600 MHz NMR
2/21/2018	Project Expectations	Lab 3, Solving an Unknown
2/28/2018	Through space Coupling	Lab 3, Solving an Unknown
3/7/2018	Magic Angle Spinning and SSNMR	Projects
3/14/2018	Spring Break	
3/21/2018	Dynamics processes in the NMR	Projects
3/28/2018	Advanced Theory	Projects
4/4/2018	Variable Temperature experiments	Projects

9. Course policies:

Attendance at all lectures and scheduled lab times is expected and required. For the research projects, NMR usage will be scheduled based on need and availability of the instruments. When students sign up for an NMR time slot they are expected to use that time.

For all instrument use, students are expected to schedule time to come in on their own to use the NMR for the lab activities or projects. The three lab activities are each scheduled for two weeks to allow students ample time to get familiar with the instrument and complete the expectations of the activity. Time for the labs and project is expected to average 3 hours per week, but will be scheduled based on student and instrument availability. Total lab time for the semester should not exceed 42 hours.

10. Evaluation:

8 homework assignments (10 points each): 80 points total

Final Project Presentation: 100 points

12. Disabilities Services:

The Office of Disability Services implements the Americans with Disabilities Act (ADA), and insures that UAF students have equal access to the campus and course materials. Students with documented disabilities who may need reasonable academic accommodations should discuss these with the instructor during the first two weeks of class. The instructor will work with the Office of Disabilities Services (*208 WHIT, 474-5655) to provide reasonable accommodation to students with disabilities. You will need to provide documentation of your disability to Disability Services.
