Ph.D. Anthropology

B.A., University of Montana, 2008; M.A., University of Alaska Fairbanks, 2012.

thesis: Ethnoarchaeology of the Middle Tanana Valley, Alaska

This study explores the shifting constructs of identity for the Middle Tanana people at the Swan Point and Pickupsticks archaeological sites. Construction methods there show a shift from single-family structures to multifamily houses approximately 1,000 to 1,800 years ago, reflecting the social importance of the potlatch in bringing nonrelated kin together in one society.

Ph.D. Counseling and Counselor Education: Interdisciplinary Studies

B.A., University of New Brunswick, 2002; M.A., Anna Maria College, 2006.

thesis: Beyond Trending: Using Risking Connection as a Framework for Moving  
Agency Culture Toward Trauma-Informed Care

Risking Connection (RC) is a curriculum-based training program that works with agencies interested in becoming trauma-informed. The current study examined the impact of RC on trainee outcomes for knowledge gain, attitude change and vicarious trauma on 119 participants who work at a therapeutic group home system in Atlantic Canada.
