PROTECT RESOURCES GOALS

- x Reduce campus water use (indoor and outdoor) 7% per year below the 2012 baseline to achieve total reduction of 70% by 2025.
- x Reduce JAF's carbon footprint by 3% per year below the 2012 baseline to achieve total reduction of 30% by 2025.
- x Increase JAF's renewable energy generation by 3% per year (absolute, not compared to a baseline) to achieve total generation of 30% by 2025.
- x Review and adapt campus design/construction standards to further integrate sustainability by 2015.
- x Increase student, staff and faculty alternative transportation use by 25% by 2025 via incentives and challenges.

<p>Inventory and Prioritize Renewable Energy Application</p> <p>This action incorporates the AASHSTAR renewable energy credit with a focus on solar photovoltaics (PV) but also potentially technologies such as solar thermal. The calculations in this action assume that UAF is able to obtain 30 percent of their energy consumption from renewable sources by 2025. It includes an inventory of buildings for best renewable energy application, followed by implementation. Buildings without access to the campus CHP plant should be prioritized.
