# Whale and Krill Tower Game

Explore baleen whales and the huge amounts of krill that support them!

### Materials Needed:

Jenga type tower game or similar stacking blocks, bowhead whale cutout (or draw your own), scissors, tape.

Krill. Image: NOAA / Roger Hewitt.

#### Did You Know?

Baleen whales eat huge amounts of tiny ocean animals called *zooplankton*, such as krill, every day. They filter water through baleen plates in their mouths to capture food.

#### Instructions:

Stack the tower together. Out out and tape the whale to the last piece in the top row. Imagine each block is
